

CASE STUDY

IRON ART s.r.o., Vraclav Czech Republic

Customer problems:

IRON ART s.r.o. is the producer of iron furniture and they export up 80% their production. They have 14 places welding Mig-Mag. Our solution, was instaled 14 Original arms with extension hood, FilterMax 6000, NCF 80/25 with frekvency invertor and automatic flaps. This solution is very successful and customer is satisfied.

Solution with frekvency invertor is great and this instalation is good refrence in Czech Republic.
